

Totalview 3.2

- New features

OpenScope Office Presence Connector

OpenScope Office Presence connector transfers the user presence state from MyPortal client to Totalview Client and Totalview Switchboard.

Multiple Language Support (Language Packs)

Language packs available for Totalview Client and Totalview Switchboard in Danish, German, Swedish and Faroese. - Other language packs will be available upon request.

Multiple Views and Today's Calendar

Multiple list views added to Totalview Client and Totalview Switchboard. Choose between Detailed view, Compact view, Tile view and Calendar view. Also Today's Calendar view is added to columns list.

Phone Conference

Added support for creating conference and adding users to current conference from Totalview Client and Totalview Switchboard.

Favorites

Choose and find your favourite users quickly and easily. Favourites function is added to Totalview Client, Totalview Switchboard and Totalview Mobile Web Client.

Switchboard Message Templates

Add your three favorites message templates as Speed Buttons, and hide/unhide *SMS* and *E-mail* buttons. Also added support for starting an external program using Templates.

Totalview Mobile Web Client

Mobile phone and local phone state displayed on Totalview Mobile Web Client, and added support for selecting local device to use when using Remote Calling.

Reset Client Settings

Reset layout settings on Totalview Client and Totalview Switchboard to default by adding RESETLAYOUT parameter to client shortcut.

Totalview Command Shell

Added support to execute phone service commands using Totalview3Command shell.

Search

Option added to disable clearing of search field when initiating call in Totalview Switchboard.
